

Aluminium Alloy Sheet AA 1100 - H14

DESCRIPTION

Aluminium alloy **AA-1100** is a popular grade of Aluminium for general purpose sheet metal works where moderate strength is the requirement. **AA-1100** is also known for its excellent corrosion resistance, high ductility and reflective finish.

APPLICATIONS

AA-1100 is typically used in:

- General sheet metal works
- Lightly stressed panels
- Architectural flashings
- Name/number plates
- Heat exchangers
- Food containers
- Light reflectors

Please note that the Mechanical Properties shown are for **H14** temper*

***H 14** – Most common temper, is work hardened by rolling to half hard, not annealed after rolling.
